

TIRE-PATCH MB/MS Maruni Bias Patch

Can be used on all types of bias tires from passenger cars to heavy construction equipment. This patch is developed to ensure safer, easier, more economical and durable repairs.

Properties

- Can be used on all types of bias tires from passenger cars to heavy construction equipment.
- A wide variety of product types to repair any type or size of injury.
- Select a patch depending on the type and location of injury (MB for tread, MS for sidewall)
- Provides permanent repairs.
- Rubber is compounded to provide strength and to last longer. Also features a reinforcing inner layer composed of strong nylon fibers.
- The bonding and reinforcing layer are combined and will not separate.
- Can be cold cured (chemical self-vulcanizing) to enable quick and effective repairs.
- When cold cured, always use with SUPER VALKARN G / CFC FREE.
- Use with STEM and SEALINER / CFC FREE for more complete repairs.
- Can be hot cured as well. When hot curing, always use with THERMO LIQUID.
